Decorating Made Easy™

# From Traditional to trendy, Bakery Crafts is #1 in wedding kit sales.

Take advantage of our complete library of wedding kit photos to customize your presentation of inventoried Bakery Crafts Wedding Kits.

## Presentation Manual

The Presentation Manual includes a *Things to Consider* list. Future brides and grooms can browse through tips from how to pick the perfect wedding cake to which accessories will accentuate their personal wedding centerpiece. Bakery Crafts has a variety of cake jewels, gum paste flowers, figures, and ornaments to adorn any design. Other helpful information includes a serving's guide for cakes with or without a top layer to plan for any size gathering.

## Instruction Manual

The coordinating Instruction Manual includes pictures of each cake with step-by-step instructions in both English and Spanish.

Other instructions include:

- Stacking and separating a cake
- Making scallop and other design features on the cake sides
- Cutting the cake
- Boxing the cake
- Using Fondant
- Adding bow details

## The Assembly Kit

Everything you need to build the cake comes in the kit, except the cake. No need to figure out what plates, columns, boards or wedding boxes to order. Ordering extra pieces creates excessive inventory. Delivery and set-up are worry-free with no equipment to be returned.

Single Plate Separators (SPS) plate system and columns make assembly a breeze:

- One-time use concept
- Simply and accurate centering of supporting tiers
- Adjustable columns height
- Easy dismantling of stacked cake on boards\* for cutting slices
- Eliminates unsafe pegs and wooden dowels

Selections using our Single Use Stands (SUS) benefit from:

- Strong, durable, and recyclable tubing
- Extremely stable construction
- Disposable Styrofoam plates
- White drape and ivy accessories included
- 3, 5, and 6 tier designs
- 1, 2, 3 assembly

Our unparallel Delivery System consists of boxes with templates that secure the cake tiers in place for transportation. Use the fold away sides for easy cake removal and a smooth, undisturbed placement.

\*Note: A Cake board under each cake is recommended to prevent sweating. We do not recommend decorating cakes directly on plates. Cakes tend to sweat and slide off plates. Bakery Crafts has designed this unique structural system to eliminate sliding. The combination of the durable "Single Plate Separator" plates and sturdy columns create a secure structured wedding cake which allows for ease of consumer pick up.
